IMPERIAL OIL LIMITED

SARNIA, ONT., APRIL 18TH, 1935.

To the Shareholders of
Imperial Oil Limited:

The balance sheet as of December 31st, 1934, and statements of surplus and of profit and loss for the year ending on that date are submitted herewith by your directors.

This report shows the wide ramifications of your Company's operations through its ownership of world transport facilities and also that by far the greater part of its petroleum business is conducted in world trade outside of Canada through the operation of various subsidiary companies in which there are large minority interests. Of the total production of crude oil by your Company's foreign subsidiaries only 19% was brought to Canada. The balance of 81% was sold to Europe, the United States, South America and other foreign countries.

Rates and prices paid to your Company's own marine department, to affiliated and to subsidiary companies for transportation services and for supplies of crude oil and other materials were the rates and prices established by free competition in world markets.

EARNINGS

Of the total net income for 1935 the amount derived from Canadian refining and marketing operations was $2,498,195.73 (after provision for income taxes), being equivalent to 10.17 cents per share. This compares with $3,023,406.12, or 11.23 cents per share during 1934.

The balance of the total net income for 1935 of $2,498,195.73 (after provision for income taxes) was equivalent to $2,498,195.73 cents per share. It was derived from transportation, from dividends paid by subsidiary companies, including dividends from subsidiaries operating outside of Canada and from miscellaneous income.

Total net earnings of your Company during 1935 from all sources (after provision for income taxes) were $3,023,406.12, or 11.23 cents per share, as compared with $3,771,655.69, or 95.73 cents per share in 1934.

CANADIAN REFINING AND MARKETING

Notwithstanding a larger demand for petroleum products in Canada during 1935, in the supplying of which your Company shared, there was a continued contraction in the speed between the cost of crude oil and the Canadian prices of the principal products of petroleum. The net earnings derived from Canadian refining and marketing operations were $1,821,313.31 less than in 1934. Further operating economies amounting to $298,195.73 were made in 1935, notwithstanding an upward adjustment of wage scales in the refineries effective January 1st, 1935. These economies were largely offset by an increase in income taxes, provincial, corporate, municipal and school taxes applying to Canadian operations, which totalled $242,828.77 more in 1935 than in 1934.

Since it began to do business in 1893 your Company has endeavored to serve all parts of Canada. Such a character of service naturally involves certain costs not entailed in supplying limited areas.

WESTERN CANADA PRODUCING

Your Company's subsidiaries completed one well and began drilling another well in the Turner Valley field during 1935. They also acquired an interest in a well in the southern extension of the field and completed the purchase of small properties in the older part of the field with a view to further conservation of gas and more economical operation.

Production by your Company's subsidiaries in the Turner Valley totalled 662,955 barrels as compared with 717,501 barrels during 1934. A new absorption plant was completed in the south end of the field during the year and by its operation the ratio of recovered naphtene gas production was increased. Notwithstanding this higher ratio of recovery, the total production of naphtene by your subsidiaries was 83,536 barrels less in 1935 than in 1934. This was in line with your Company's policy of prolonging the life of the Turner Valley field. Purchases from other producers in the field amounted to 253,742 barrels as compared with 233,312 barrels in 1934.

Geological and geophysical work was carried on and resulted in the selection of two areas in Alberta on which drilling may later be begun.

At the end of the year your Company's subsidiaries controlled 82 oil and gas wells in Western Canada.

MARINE DEPARTMENT

A total of 29,012,696 barrels of crude oil and petroleum products was transported by the Imperial Oil and International Petroleum fleets during the year 1935 as compared with 28,641,278 barrels in 1934, an increase of 1.28%. These fleets comprised 28 vessels with an aggregate of 181,005 deadweight tons.

SOUTH AMERICA

During 1935 exports by your Company's subsidiaries of crude oil and refined products from Colombia and Peru were 29,201,368 barrels.
The refineries at Barranca-Bermeja, Colombia, and at Talara, Peru, processed 7,536,248 barrels of crude oil during the twelve month period.

Crude oil production in Colombia was 17,597,654 barrels, an average of 48,213 barrels daily, as compared with 17,340,724 barrels, or a daily average of 47,569 barrels in 1934. Natural gas produced in Colombia in 1935 was 546,908 barrels against 543,629 barrels in 1934.

In Peru, 14,750,911 barrels of crude oil was produced, or 40,610 barrels daily, as compared with a production for 1934 of 14,650,162 barrels, or 48,717 barrels daily average. Natural gas produced in Peru was 1,058,221 barrels as compared with 1,058,763 barrels in 1934.

**GENERAL**

Throughout the year your directors enjoyed loyal and able co-operation from all ranks of the personnel. Your directors' experience has always been that the special provisions made for the well-being of employees redound not only to the advantage of those employees but to the benefit of the consumer and to the advancement of the shareholders' interests.

Following an application by the executive of the Co-operative Trading Association of Saskatchewan for revision of the rates of Customs duties on crude petroleum and its derivatives the Tariff Board held an extensive inquiry into the Canadian petroleum industry. Concurrently there was an inquiry by Royal Commission in British Columbia into the economic relationship between the coal and oil industries in that province. At this date no reports have been published in connection with these inquiries. In these, as in previous inquiries, your Company's executives had to carry the burden of most of the work necessary to provide the vast amount of data required with regard to the operation of the petroleum industry in Canada.

In the conduct of an industry it is most desirable that plans for the future be formulated with reasonable confidence. This is exceedingly difficult to do at a time when judgment must defer to the many uncertainties arising out of a general instability in conditions which your Company must face in the operation of its business. Caution has always played a large part in the direction of your Company's affairs and its importance in this perplexing period must not be under-estimated.

By order of the Board,

G. HARRISON SMITH,  
President.

---

**AUDITORS' REPORT TO THE SHAREHOLDERS**

To the Shareholders of Imperial Oil Limited:

We have made an examination of the balance sheet of Imperial Oil Limited as at December 31, 1935, and of the statement of profit and loss and surplus for the year ending on that date. In connection therewith, we examined or tested accounting records of the company and other supporting evidence, and obtained all the information and explanations which we required; we also made a general review of the accounting methods and of the operating and income accounts for the year, but we did not make a detailed audit of the transactions.

In accordance with section 114 of the Companies Act, 1938, we report that in the case of such subsidiary companies as incurred losses up to December 31, 1935, the parent company's proportion of such losses has been fully provided for in the books of Imperial Oil Limited and in the attached balance sheet. In the case of all other subsidiary companies, profit have only been taken credit for in the accounts of Imperial Oil Limited, and in the attached balance sheet, to the extent of dividends received by the parent company from such subsidiary companies; such dividends received in 1935 and included as income in that year exceeded the company's proportion of the aggregate net profits of subsidiary companies for the year 1935 by $8,828,597.96 and to this extent were paid by these companies from surpluses previously earned.

Freights are billed from the transportation department to the refining and marketing departments at competitive market rates for such freight, and as a result there is an inter-departmental profit of approximately $135,000.00 included in the inventory valuation in the attached balance sheet.

In our opinion, based upon such examination, and subject to the remarks above, the attached balance sheet is properly drawn up so as to exhibit a true and correct view of the state of the company's affairs as at December 31, 1935, according to the best of our information and the explanations given to us, and as shown by the books of the company.

PRICE, WATERHOUSE & Co.  
Chartered Accountants.

March 31, 1936.
